

AIA CE COURSE

High-Performance Windows & Doors in Sustainable Building Design

DETAILS

Credit: 1 AIA LU/HSW

Course #: ESC001

AIA Member #: 38836605

Provider: Eco Supply

COURSE DESCRIPTION

The purpose of this course is to understand the advantages of high-performance windows and doors. We will discuss the components of high-performance windows and doors, their influence on comfort and energy cost savings, and flexible use through case studies.

LEARNING OBJECTIVES

General Overview of Sustainable High-Performance Windows & Doors.

Understanding Comfort Coefficients through Thermal Performance, Air Infiltration & Convection Loop, and Sound Attenuation.

Learn main window and door components, as well as the safety, efficiency and comfort they provide.

Explore customization and efficiency benefits through Case Studies.
